- Dr. Pearson has been fantastic. Initially, I was very worried because it's a writing class but he took extra time to help me write better papers! And it worked! He really caused us to evaluate important issues and be prepared to better define our positions. I loved the material and I loved the classroom discussions. I'm amazed at his teaching style of allowing a flow of conversation in the classroom. It's quite effective and much more enjoyable than just lecture alone. He allows for all viewpoints and does not seem judgmental. Loved it!
- This class is useless.
- I wish we had more time to analyze each of the books deeper. It seemed like we just skimmed the surface many times.
- His grading style is vague, the comments he gives and the grade reflections seem like two different things. Class was also cancelled way too much.
- I enjoyed learning about the different theories and concepts Dr. Pearson taught me.
- Dr. Pearson is a wonderful teacher! He did a great job of encouraging students to read and I always felt like I understood every book we read. He has a great teaching style, and I sad that he is not here at jewell for very long.
